### **Alphatex Corporation Receives ISO 9001:2008 Certification with the Assistance of a Government Grant**

Miami, Florida - Alphatex Corporation announces that with the assistance of Green and Sustainable Solutions, Inc. (GSS) and a government Grant it attained ISO 9001:2008 Certification of its Quality Management Systems for the worldwide distribution of electronic components in only 8 months and with zero non-conformities.

ISO certification signifies the company has met a rigorous set of internationally recognized standards which provide evidence to customers, suppliers, and employees alike, of the excellence in the quality of service and customer satisfaction. Attaining this certification entails a lot of hard work, time, and effort. "Implementing and becoming certified to this globally accepted ISO Quality Management System provided us with a standardized process and practice that will make us more effective, efficient, and will increase the quality of the service that we provide" noted Paul Pressi, Quality Manager at Alphatex.

Fernando Prezzi, President of Alphatex Corporation, comments "By implementing the ISO 9001:2008 Quality Management System we are now able to more closely monitor and improve our systems to enhance the customer experience. Certification to this global standard will also increase the number of customers as every day more and more customers are making purchasing decision based on whether or not a supplier is certified to ISO 9001:2008. All of this would not have been possible without the assistance of Green And Sustainable Solutions, Inc. (GSS). Gil Lugo and Bob Gilbert from GSS demonstrated extensive experience and greatly reduced the amount of our internal resources that we would have had to allocate to this important endeavor. GSS assisted Alphatex by creating and organizing our documents and trained all our employees on how to implement and sustain an effective ISO 9001:2008 conforming system. Additionally GSS secured a Grant that reimbursed us 75% of the project costs. A project of this magnitude would not have been economically feasible without the Grant."

The ISO certification and registration was done by NSF International Strategic Registrations (NSF-ISF) an accredited registrar based out of Ann Arbor, Michigan that performs the global assessments of management systems.

#### **About Alphatex Corporation**

**Alphatex Corporation**, established in 1995, is a world leader in the distribution of electronic components. Headquartered in Florida, Alphatex has been serving a wide range of international manufacturers and distributors. With global operations, Alphatex specializes in buying and selling active, passive, electrical and electronic components, as well as computer peripherals.

#### **About Green And Sustainable Solutions, Inc.**
